PROPERTY PALETTE: FMOD Studio is a cross-platform game audio design utility that can assist designers in creating impressing and realistic sounds to integrate in complex game-related projects. Adopting a new approach to sound processing, it relies on generative audio delivering, in the attempt to build unique sounds that adapt to the in-game requirements. Generate stunning sound systems for games or other apps With a stylish interface and an organized layout, FMOD Studio enables you to create elaborate multi-track sound events and high-quality music that can really enhance the experience of a gamer or the final user of an application. It features a rich and carefully-selected set of tools ready to help sound designers generate astonishing content without any programming knowledge. Furthermore, its live in-game support provides complete control over the sound mix in real-time, which enables you to generate a versatile music system with impressive audio effects. Deliver impressing results by adjusting sound properties FMOD Studio can work with common file formats, such as WAV, MP3, OGG, AIF, WMA, FLAC, AIFF and RAW. The application performs an analysis of each file placed in the 'Events' library, providing you with various properties to customize to your liking. You can make fine adjustments to the volume and the pitch level, change the style of the distance attenuation curve, activate voice stealing (replacing an event with another, for instance, lowering music when a character is speaking), modify the event priority or apply reverb effects to audio signals. Create responsive and interactive audio events for games FMOD Studio is a great tool for professional sound designers and beginners alike, enabling them to combine and tweak the properties of multiple signals so as to obtain sounds that dynamically respond to in-game events. The integrated mixer enables you to freely alter the order of the signal chain even in live mode, when FMOD Studio is connected to a game, while the built-in profiler helps you assess the performance of the entire sound system.
